EDUCATION

Sri Sakthi Vinayagar matric.hr.sec.school, Cumbum — 12th

MONTH 2022- MONTH 2023

PSNA College of Engineering and Technology,Dindigul — BE CSE

september 2023 - september 2027

PROJECTS

College Event Management website-built using Python, SQL, HTML ,CSS, JS

This project is a simple web-based event registration system developed using Python. It allows students to register for technical and non-technical events by submitting a form through a website. The backend is built using Python with MySQL database integration to store student details like name, year, and selected event. I used Python's `Flask` framework to handle HTTP requests and database connections. The application ensures proper data storage and can be easily extended for admin viewing and management. This project demonstrates my skills in Python web development, form handling, and MySQL database operations.

HOBBIES

1. Playing chess.
2. Reading books.
3. Practice coding on leetcode and hackerRank.

SKILLS

1. Python Programming.
2. Java Programming.
3. Web development.
4. SQL Programming.
5. Git and GitHub.

Additional

- 1.Cisco certified IoT and Digital Transformation
- 2.HackerRank certified python Developer
- 3.Error Makes Clever certified Front developer
- 4.Linkedin certified for CSS
- 5.Octanet services PVT LTD certified web developer.
- 6.Digilabs certified for python and HTML.
- 7.Attend a 1 day workshop on robotic
- 8.I regularly engage on coding on platform like leetcode and HackerRank

LANGUAGES

1. Kannada.
2. English.
3. Tamil.
